VERSATILITY

The uniquely designed AISLE-MASTER is engine powered and can therefore do the work of both a conventional forklift and a reach truck, with the flexibility to work in **very narrow aisles**, plus unload trucks in unpaved yards. Container loading is also possible.

VISIBILITY

The **superior visibility** achieved in narrow aisle, **high reach** situations, ensures greater placement accuracy and **less product damage** compared to other lift trucks. The controls are ergonomically designed to **maximise driver comfort and performance**.

MANEUVERABILITY

The unbeatable **maneuverability** is achieved through AISLE-MASTER's articulated design, providing faster load cycle times and **reduced driver fatigue**. The efficiencies gained ultimately result in **increased profitability**.

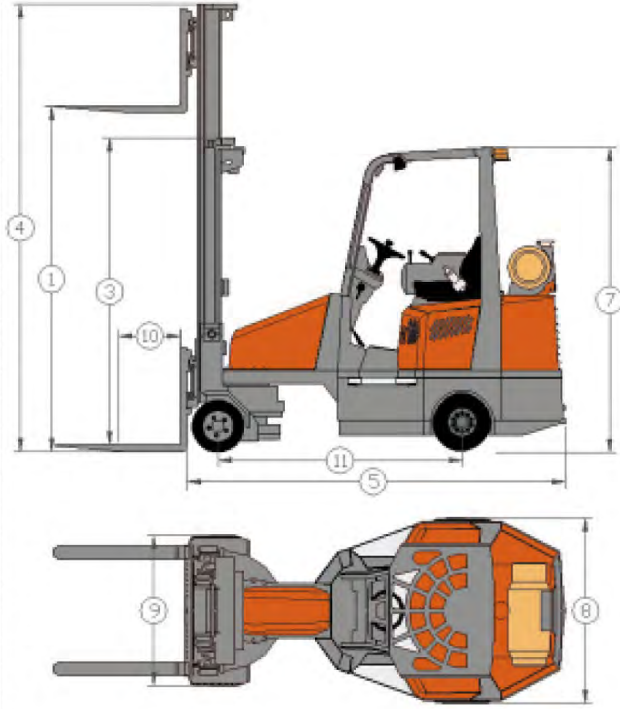

STABILITY

The AISLE-MASTER has been designed to maintain **optimum stability** when fully articulated, ensuring operator safety without compromising lift height. Double handling is also eliminated, which further **increases productivity**.
